EXTERNAL ENCLOSURE USER'S MANUAL

A. Driver Installation Guide

- No Driver required in Windows ME / Windows 2000 / Windows XP operating system.

- **For Windows98SE**

(Make sure the external device is disconnected before the installation)

1. Please insert driver CD into CD-ROM.

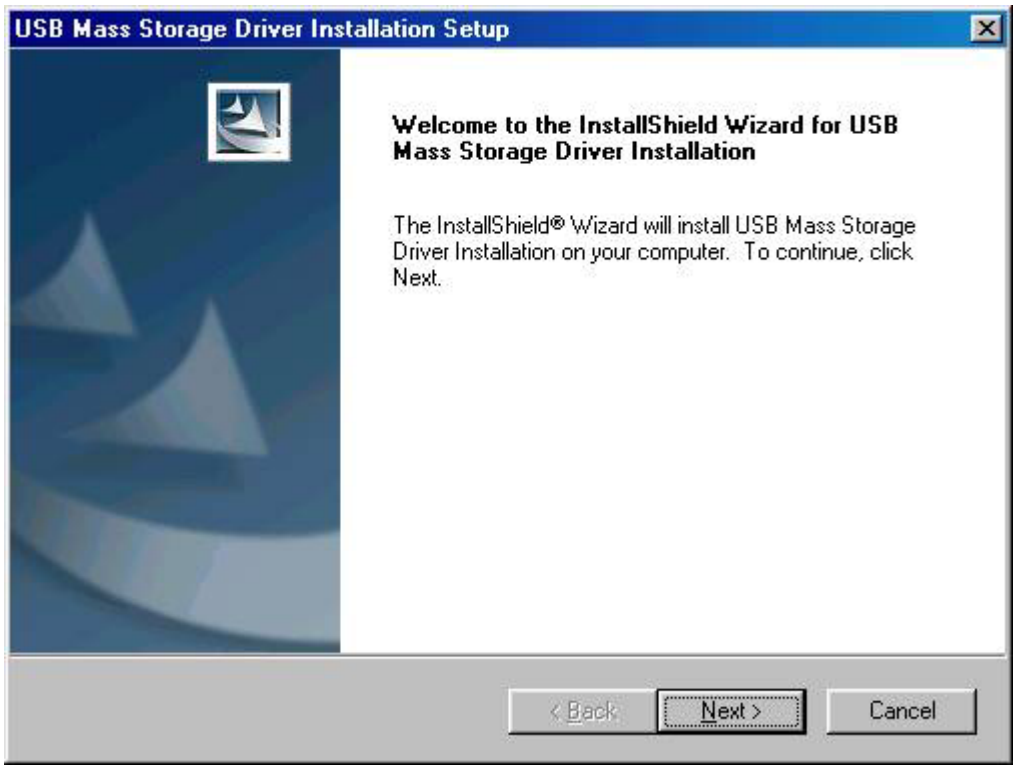
2. Windows will automatically run the installation wizard, select "Driver & Manual for External Enclosure (1.8" / 2.5" / 3.5" / 5.25"), > "Driver for Win98/Win98 SE" on the menu.

The driver will be installed automatically.

Or you can double click the installation file "SETUP.EXE" in the following directory:
CD-ROM \ External \ DX-U2 \

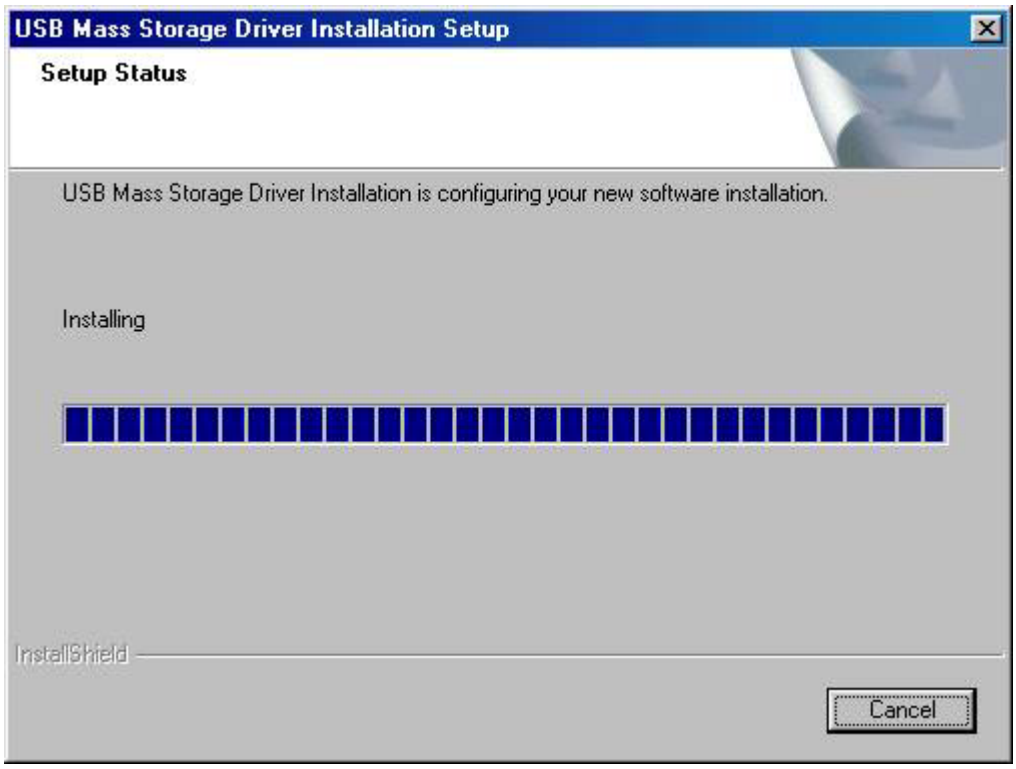
The steps of installation are shown as below:

1. Start installing, click "Next" to continue



USB Mass Storage Driver Installation Setup
Welcome to the InstallShield Wizard for USB Mass Storage Driver Installation
The InstallShield® Wizard will install USB Mass Storage Driver Installation on your computer. To continue, click Next.
< Back
Next >
Cancel

2. Driver Installing



After driver installation is completed, please connect the 1.8" external case to your computer, and in few seconds the new 1.8" external drive will be recognized
in "my computer" window and ready to use.

C. Driver Installation Guide (FOR MAC)

Support only Mac OS 9.X and later version (PnP), no driver installation is required.
